### APPLICATION STEPS

*Before applying the product it is necessary to take a preliminary test to evaluate the suitability of the product on an unexposed area or unused piece of material*

#### Surface Preparation

- Before proceeding with the cleaning, it is advisable to clean away any surface residues, such as dust, debris, and coarse dirt, using a broom or a vacuum cleaner.
- Wait for the surface to be treated to be completely dry.
- Any surfaces close by not to be treated with the product must be protected.
- Apply the product to surfaces with a temperature between +5 and +40°C

#### Application

- Dilute the product in clean water. Pour 1 part of the product into 2 or 3 parts of water, according to the amount of dirt and the stubbornness of the residues to be removed. To remove extremely stubborn dirt the product can be used undiluted.
- Begin to work the solution on the surface using the preferred tool.
- Let the product act for 10 - 15 minutes, working it every now and then to boost its action.
