

ADVANTAGES:

- EASY INSTALLATION
- EXCELLENT FOR HIDING AND EQUIPMENT
- ALWAYS A FLAT PAVING AND EASILY ACCESSIBLE
- EXCELLENT ABSORPTION OF STRUCTURAL MOVEMENT
- BETTER ACOUSTIC INSULATION
- HIGHLY RESISTANCE
- SIGNIFICANT LESS WEIGHT

ADJUSTABLE HEIGHT:

We have a solution height from 1/8" to 50".

MATERIAL:

20% Talc-illed Polypropylene and rubber

ENVIROMENTAL IMPACT:

Reusable and recyclable - Non-hazardous waste

APLICATION:

On any waterproofing membrane, rigid insulation panel, solid and compact surface.

MECHANICAL TESTS:

Compression tests after articial aging showed the pedestals maintained structural integrity and load-bearing capacity even after undergoing aging cycles.

CHEMICAL TESTS:

Resistance to de-icing salts: Pedestals were tested to assess durability against salts used for ice melting.

Chlorine resistance: Tested for stability when exposed to chlorine, simulating conditions near swimming pools.

Frost-defrost cycles: Examined the eects of repeated freezing and thawing on the pedestals.

Immersion in hydrocarbons: Tested for durability when submerged in substances like petrol and diesel.

FIX COLLAR: Fix and lock height after adjustment, increase stability

SHIM: Anti-slip, reduce impact, absorb shock, compensate floor thickness difference.

ADVANTAGES:

- Excellent for hiding equipment

- Excellent absorption of structural movement

- High resistance

- Quick water drainage

- Always a flat paving and easily accessible

- Better acoustic insulation

- Significantly lightweight

- Better thermal insulation
