NT PAVERS

high visual impact and high performance

NT Pavers Presents: A New Era of Surface Design
Exclusive Large-Format Porcelain Slabs

At NT Pavers, we believe that surfaces should do more than just cover space; they should inspire it. With that vision in mind, we're proud to introduce our exclusive collection of large-format porcelain slabs: a curated offering of some of the most refined, expressive materials available in the design world today.

This is where architecture meets art.
Our slabs are selected not just for their beauty, but for the emotion they carry. Deep veining, soft gradients, stone-inspired textures, and contemporary compositions come together in a bold visual language that speaks to designers, architects, and creators of exceptional spaces.

Whether used as a dramatic feature wall, an elegant bathroom surround, a luxurious kitchen counter, or a seamless fireplace face, these slabs deliver scale, sophistication, and timeless design. They are meant to be experienced, not just installed.

Crafted by renowned Italian manufacturers and tailored for those with a discerning eye, each piece in our slab collection reflects NT Pavers' commitment to quality, exclusivity, and design-forward thinking. This collection is not mass-market. It's a handpicked portfolio of standout surfaces that turn interiors into statements.

As we continue to shape the future of surfaces, our large-format slab collection opens a new chapter, one defined by bold scale, refined aesthetics, and a pursuit of perfection in every detail.

Thassos

slender lightweight strong

Alongside a thickness of 6.5 mm and a weight of 15.5 kg/sqm, this material also features incredible strength and resistance. (Bending resistance ≥ 50N/mm2; breaking load > 1.500 N)

large modular sizes

Available in a range of sizes to meet the needs of contemporary architecture. Modular sizes can be mixed and matched, with 2 mm joints between the tiles.

self leveling

These materials offer strength, elasticity, and flexibility. They can be used to create perfectly flat surfaces, which other materials don't allow.

easy to handle

Even in the 240 cm size, the slabs are easily moved around on the worksite and need no special hoisting systems (e.g. no platforms, ...). They are also easy to manoeuvre in narrow spaces, such as hallways, stairways, etc.

easy to lay

Thanks to the slender size and the laying equipment available today, cuts and holes are quickly and easily made.

easy to clean

The compact nature and non-absorbency of the material's surface mean the slabs are easily cleaned with household detergents.

eco friendly

Use of natural raw materials, lower energy consumption per square metre, and green products for everyday cleaning, mean this material meets new environmental requirements.

a wide range of uses

Wall tiling indoors and out, flooring and paving, for homes and light business use, plus overlaying on existing floors and pavements too. Ideal for situations such as heated floors and for covering doors, work tops, etc.

TOTALLY WATERPROOF

STAINPROOF

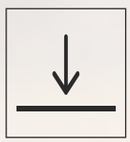
RESISTANT TO MOULD, MILDEW, AND FUNGUS

RESISTANT TO HEAT AND HIGH TEMPERATURES

RESISTANT TO CHEMICALS, ACIDS, BASES, AND SOLVENTS

FROSTPROOF

UV-RESISTANT



WITHSTANDS BENDING

ALL-OVER
TECHNOLOGY
